Pacific Mental Health and Addictions Implementation Plan 2008-2012
Counties Manukau District Health Board

Pacific Mental Health and Addictions Implementation Plan 2008-2012
Foreword
Talofa lava, Kia orana, Malo e lelei, Fakalofa lahi atu, Taloha ni, N i sa bula and warm Pacific greetings

For Pacific peoples mental health encompasses social, emotional and spiritual well-being. Our mental wellness is a critical factor in developing and maintaining relationships with others, achieving our personal goals in life and it is necessary to ensure that we are active participants in our families, churches and communities. This holistic approach means that when something is not going so well in another sphere of our lives it affects our mental and emotional wellbeing. The CMDHB Pacific Mental Health and Addictions Implementation Plan recognises the context in which Pacific peoples understand mental health and addictions and aims to incorporate that view into the development and delivery of services for Pacific peoples in the Counties Manukau District.

The Implementation Plan pulls together the various strands of activity that are happening for Pacific people across the Counties Manukau District in order to coordinate activity and to enhance a collaborative approach. The focus of the Implementation Plan is on those activities that are specifically targeting Pacific consumers and their families in the Counties Manukau District.

The Pacific Health Advisory Committee supports the approach that has been taken to develop the Plan and looks forward to working alongside the Pacific community, consumers and their families, mental health and addiction service providers, specialist services and the District Health Board to implement the key deliverables outlined in this document.

Acknowledgements

Counties Manukau District Health Board (CMDHB) wishes to thank those individuals and organisations which contributed to the development of the Implementation Plan. In particular, CMDHB would like to acknowledge the following organisations which are represented on the CMDHB Pacific Mental Health and Addictions Stakeholders Forum:

- Faleola Services, CMDHB (Pacific Mental Health Services)
- Pacific Island Drugs and Alcohol Services (PIDAS)
- Pacific Mental Health & Addiction Services, WDHB (Malaga, Isalei & Tūpū)
- Pacificare Trust
- Penina Health Trust
- Procare PHO
- Ta Pasefika Health Trust
- TŌA Services
- Vaka Tautua
- Whirimaki, CMDHB

CMDHB also acknowledges the invaluable contributions of the Consumer Advisory Focus Forum which was convened to provide advice on the development of the Implementation Plan.

CMDHB also extends its gratitude to the CMDHB Pacific Health Advisory Group (PHAC) for their support and involvement in the plan development.

CMDHB wishes to also acknowledge Health Safety Developments and Jett Consulting which also contributed to the development of the Implementation Plan.

CMDHB also wishes to acknowledge the following people; Natalie Leger, Rachel Enosa-Saseve, Lealofi Siō, Ti’a Kirkpatrick Mariner, Dr Sue Hallwright and Philip Grady for their efforts in co-ordinating this important piece of work.

Pacific people have a holistic view of health where a person is in tune with his/her environment and community. Health is achieved when there are positive and balanced relationships between these three elements: Atua (God), Tagata (people) and Laufanua (land/environment). Health is the state in which a person’s physical, mental and spiritual needs are in balance and the person is able to meet their obligations to themselves, their family, village and community (Lui, 2003).

Counts Manukau District Health Board’s Shared Vision:

To work in partnership with our communities to improve the health status of all, with particular emphasis on Māori and Pacific peoples and other communities with health disparities.

- We will do this by leading the development of an improved system of healthcare that is more accessible and better integrated
- We will dedicate ourselves to serving our patients and communities by ensuring the delivery of both quality focused and cost effective healthcare, at the right place, right time and right setting
- Counties Manukau DHB will be a leader in the delivery of successful secondary and tertiary health care, and supporting primary and community care
Values

**Care and Respect**
Treating people with respect and dignity; valuing individual and cultural differences and diversity

**Teamwork**
Achieving success by working together and valuing each other’s skills and contributions

**Professionalism**
Acting with integrity and embracing the highest ethical standards

**Innovation**
Constantly seeking and striving for new ideas and solutions

**Responsibility**
Using and developing our capabilities to achieve outstanding results and taking accountability for our individual and collective actions

**Partnership**
Working alongside and encouraging others in health and related sectors to ensure a common focus on, and strategies for achieving health gain and independence for our population

1.0 Introduction

The Counties Manukau District Health Board (CMDHB) Pacific Mental Health and Addictions Implementation Plan 2008-2012 signals the DHB’s intention to provide accessible, responsive and holistic mental health and addiction services for the Pacific population in the Counties Manukau District. The development process for the Implementation Plan has included a literature review and stock-take project, and the establishment of a Stakeholders Forum, all of which have informed the development of this document. In addition, the Implementation Plan incorporates feedback from other key MH & A stakeholder groups and focus groups with Pacific peoples.

The Implementation Plan provides CMDHB, NGOs and community with a framework to further develop and enhance Pacific mental health and addiction services. This Implementation Plan outlines a series of goals, objectives and key deliverables which will guide the planning, funding and delivery of mental health and addictions services and programmes for the Pacific population in Counties Manukau from 2008-2012.

The Pacific Mental Health and Addictions Implementation Plan 2008-2012 builds on, and is aligned to the following plans1:

- Te Kokiri: The Mental Health and Addiction Plan
- Northern Regional Pacific Mental Health and Addictions Plan
- CMDHB - Mental Health and Addiction Action Plan
- CMDHB - Tupu Ola Moui, Pacific Health and Disability Action Plan

This plan also supports the CMDHB approach to quality and safety, incorporating the “Triple Aim”2 - working to deliver better healthcare for our population, working to deliver better care for our patients; whilst getting value for resources.

2.0 Background

The Pacific resident population of Counties Manukau is approximately 93,000 or 19% of the total population with almost half (49%) aged 0-19 years. The Pacific population in Counties Manukau is projected to increase to over 141,000 people by 2026, which equates to an 80% increase from 20013. The planning and funding of mental health and addiction services is important to ensure that it can meet the needs of a growing Pacific population.

Pacific peoples have higher prevalence rates of mental health and addictions problems than other ethnic groups with the exception of Māori. It appears that these higher rates are due to a range of factors experienced by the Pacific population which include but are not limited to: socioeconomic disadvantage (income levels, unemployment rates, poor or overcrowded housing situations, academic attainment levels), access to culturally appropriate services, late presentation to health services and the stigma associated with mental illness in Pacific communities4.

</tr>
</tbody>
</table>

Using the census population figures outlined above for 20-59 year olds and the prevalence of mental health disorders in Table 1.0, it is estimated that there will be over 10,200 Pacific adults with a mental disorder in Counties Manukau in any year. The figures for bi-polar disorder would be approximately 1,100, substance use disorder 1,300, major depression nearly 1,500. There would be approximately 400 Pacific adults who make suicide plans and over 300 suicide attempts.

In total, it is estimated that over 2,500 Pacific people with a mental disorder would make contact with a service for mental health reasons. It is important to note that these are estimates only, but the figures provide a guide for service capacity required within Counties Manukau to meet the needs of Pacific people.

2.1 Alcohol and Other Drugs

A review of Pacific alcohol and other drug needs and services in Counties Manukau has recently been completed. Quantitative results affirmed that the proportion of the Pacific population that consumes alcohol was less than the general New Zealand population. However on average, Pacific people consumed larger annual volumes and binge drinking practices were more common than in the general New Zealand population. Additionally, greater proportions of Pacific peoples reported violence and injury from other people’s drinking than the New Zealand general population.

Age-specific rates for male Counties Manukau clients seen by DHB AOD teams showed that the rate for Pacific males aged 20-24 years was significantly higher than other ethnic groups. Furthermore, young men of Pacific ethnicity were found to have high rates of disorders associated with alcohol and drug use.

Qualitative results found that Pacific females and Pacific young people were beginning to drink more which was becoming an increasing concern for Providers and the wider community.

---

1 Including healthcare and non-healthcare.
3 MHINC data, 2005 calendar year. Unique Male Counties Manukau Residents (1102) seen by DHB AOD mental health services in New Zealand. Counties Manukau population data for 2005.
3.0 Service Provision in Counties Manukau

Counties Manukau DHB funds services for all age groups including services specifically for Pacific peoples. All health services need to address peoples’ mental health needs at the same time as addressing physical health needs. Mental health is therefore a focus for all health services including promotion/prevention services, primary care, DHB community and hospital services and Non Government Organisation (NGO) treatment and support services.

Local Mental Health Services for the population of Counties Manukau are delivered by CMDHB and a range of Non-Government Organisations. Regional services are delivered by other DHBs. The largest regional services are the Community Alcohol and Drug Services and the Regional Forensic Services both of which are delivered by Waitemata DHB. Counties Manukau DHB funds a range of specific mental health services which, when funding increases sufficiently, will eventually serve the 3% of the population whose mental health and addictions needs are greatest. In 2004/05, annual access to mental health services for the population of Counties Manukau was 1.8% of the population.

3.1 Developing ‘By Pacific’ Health Services

The Pacific Mental Health and Addictions Plan 2008-2012 seeks to increase the accessibility, quality and responsiveness of mental health and addictions services for the Pacific population. ‘By Pacific’ mental health and addiction service providers in Counties Manukau provide an alternative option for service provision for the Pacific population with these providers delivering holistic models of care that are inclusive of families and incorporate Pacific values and beliefs.

The Pacific Mental Health Workforce Development Infrastructure and Organisational Development Feasibility Study (2007:20) suggests that with the development of Pacific mental health and addictions providers there has been an increase in Pacific peoples accessing mental health and addictions services. The Pacific Provider Development Fund (PPDF) has been a significant factor in DHBs supporting the development and growth of Pacific providers. CMDHB will continue to support Pacific health providers to develop their services including best practice, workforce development, quality improvements and meeting sector standards through the Pacific Provider Development Fund in line with Ministry of Health funding criteria.

4.0 Mental Wellness – A Pacific Perspective

Pacific peoples view mental health from a ‘holistic’ perspective. A person’s physical health is not separated from their mental, emotional and spiritual health and well being. The ‘mind, body and spirit’ are deeply intertwined and need to be considered carefully in the care planning and delivery of mental health and addiction services for Pacific peoples.

In addition, relationships are critical to achieve aspirations of ‘mental wellness’ for a Pacific person – their relationship with their family, environment, community, church (God) and to their extended family networks all contribute to the mental wellbeing of a Pacific person. If there is an ‘imbalance’ or disconnect between one of those relationships then that is viewed as potentially having implications on a person’s mental health and well being.

Cultural beliefs around mental illness often mean that there is stigma associated with a person who has a mental illness. Causal factors are often seen as having its origins in a ‘spiritual sickness’ or imbalance. In particular, that the illness may be caused by a person’s actions or the actions of another family member and was subsequently seen as ‘shameful’ or ‘embarrassing’ to talk about.

---

8Section taken from the CMDHB Mental Health and Addictions Plan 2006-2010.
The changing family and community structures of Pacific peoples in New Zealand have influenced the consumption and use of alcohol and other drugs by the Pacific population. Problems often experienced by migrant populations such as balancing traditional cultural values and obligations within a western context are often difficult and conflicting. Subsequently issues resulting in generational differences and a loss of identity, culture and connections with family, church and village/community can produce adverse consequences and increase AOD related problems:

“… the lack of strong personal identity and low self esteem are core issues for the New Zealand born Pacific generation… pressures of living a “double life” - one in Western society and another within the Pacific family and church context also contribute to Pacific youth mental health issues”, (taken from the LotuMoui Symposium Report 2005: 33).

In planning mental health and addiction services for the Pacific population consideration should be given to the Pacific view that mental health and wellbeing also includes all other aspects of health, social, cultural and spiritual wellbeing, that the Pacific population is young, that socioeconomic considerations are important and there are significant differences between New Zealand-born and Island-born people, and people of mixed ethnicity (Ministry of Health, 2005).

It is also important to note that for many Pacific families they may choose to care for family members requiring more intensive supports at home as their ‘primary carer’. Often this can be a demanding role for the carer particularly where they do not access additional support or respite care options. Service planning also needs to consider family carers as they play a critical role in the lives of Pacific peoples with mental illness.

5.0 Results from the Stock-take Project and Literature Review

The following barriers to Pacific people accessing services were identified in the stock-take project:

- Stigma and shame associated with mental illness;
- Lack of understanding by Pacific families and communities of mental health and addiction issues;
- Lack of information on services
- Information about services is not easily accessible and disseminated appropriately to reach the Pacific population;
- Limited service capacity, particularly in those service areas where there is very limited FTE allocation (eg: addictions services for young people, mental health services for young people, anti-discrimination, family services, services for older people, peer-support, addictions services and gambling services);
- Lack of transport and the distance required to travel to obtain services;
- Location of current services; and,
- Workforce issues (eg: insufficient staff with language skills to cater for population, insufficient trained staff across the continuum of service delivery and especially in the area of services for young people).

A number of areas where further service development was required or where there were no current services for Pacific peoples were identified in the stock-take project and are summarised below:

- Consumer workforce development and capability building
- Programmes targeting Pacific peoples
- Further investment into primary mental health services for Pacific people
- Better continuity and coordination of services from primary to secondary care
- Family focused models of service delivery in mental health

Programmes countering stigma and discrimination associated with mental illness.
• Addiction services targeting and appropriate for Pacific populations
• Well coordinated service provision for Pacific young people for both mental health and addiction services
• Further development of acute care services including crisis intervention and respite care
• Services of older Pacific peoples and their families
• Appropriate, easily accessible and up-to-date information for the community on what services are currently available to them
• Provider development including capacity and capability building in relation to quality, staff, governance and management infrastructure
• Workforce development – including for Matua and cultural advisor roles
• Availability of ethnic-specific mental health and addiction services for the Pacific population

6.0 Implementation Framework
The Implementation Plan reflects CMDHB’s shared vision to work in partnership with its communities to improve the health status of Pacific peoples.

6.1 Guiding Principles for Pacific Service Delivery within Counties Manukau DHB
Six guiding principles have been identified through the development of the Implementation Plan to provide some guidance on the delivery of mental health and addiction services to Pacific peoples:
1. Services are holistic in their approach and reflect a Pacific perspective of health and wellbeing. Pacific perspectives are inclusive of both NZ born and Island born world views.
2. Services are family focussed and acknowledge the important role of family and social relationships including with extended families, church and ethnic-specific groups.
3. Services are community-focused and foster community ownership linked to ethnic identity, a sense of belonging and language.
4. Services recognise the importance of partnership with other groups and cultures, including an acknowledgement of the status of Māori as mana whenua and demonstrating a commitment to the principles of the Treaty of Waitangi.
5. Services and programmes encompass a Quality Improvement culture which promote innovation and new ways of improving the effectiveness of mental health and addiction services for Pacific peoples.
6. Align with the Pacific Provider Development Fund principles10.

6.2 Action Areas
The plan supports the development of continuous improvement of safety and quality throughout the Action Areas. Supporting the triple aim of: (a) better services for the population, (b) better services for the patient, and (c) value from our resources, through a focus on the delivering patient care that is safe, patient centred, effective, timely, equitable and efficient.

1. Promotion and Prevention
2. Primary Care
3. Responsiveness
4. Child and Adolescent
5. Addiction Services
6. Older People
7. Workforce Development
8. Quality Improvement: Information and Research

6.3 Goals

1. Well Pacific families and communities in Counties Manukau.
2. High quality mental health and addictions primary health care services to Pacific people in Counties Manukau.
3. Responsive mental health and addiction services for Pacific people (Adult, youth, child, infant) and their families in Counties Manukau who are affected by mental illness and/or addiction.
4. Pacific children and young people in Counties Manukau who are affected by mental health, alcohol, drugs and gambling problems access quality and appropriate services.
5. Pacific people and their families in Counties Manukau are able to access effective and appropriate addictions services.
6. Older Pacific people and their families in Counties Manukau are able to access effective and appropriate addictions services.
7. Competent mental health and addiction workforce supporting Pacific people in Counties Manukau who are affected by mental illness and addictions.
8. Mental health and addictions services for Pacific peoples in Counties Manukau are based on the best available evidence.
9. Better quality of healthcare for Pacific people in Counties Manukau through working to deliver better care for our patients, whilst getting value from our resources.

A comprehensive list of objectives and key deliverables is outlined in the Implementation Framework.

7.0 Partnerships and Relationships

In order to implement the Plan successfully it will be important to strengthen and build strong partnerships between consumers, providers, community and CMDHB services. This will be achieved through, but is not limited to the following mechanisms:

7.1 CMDHB Pacific Mental Health and Addictions Stakeholders Forum

Membership on this group includes Pacific NGOs, mainstream NGOs who are providing services primarily to Pacific peoples, provider arm services (ie: Faleola), and other individuals who specialise in Pacific mental health and addictions services in the Counties Manukau District. The aim of this group is to strengthen planning and sector leadership around the development and implementation of the Pacific Mental Health and Addictions Implementation Plan 2008-2012. The forum enables a coordinated approach between the work activities of mainstream and Pacific mental health service providers to address the mental health and addiction needs for Pacific peoples.

7.2 Pacific Health Advisory Committee (PHAC)

PHAC provides valuable advice from a “whole of community perspective” on strategies to reduce disparities in health for Pacific peoples. PHAC represents a range of ethnic groups and has expertise across a number of different health sectors. PHAC is an appropriate forum to provide advice on the implementation of key deliverables within Pacific communities.

7.3 LotuMoui Health Committee / Ministers Forum

There are a number of key deliverables that will be implemented through the LotuMoui Programme. To ensure that these activities are appropriate and relevant to LotuMoui church communities, CMDHB will work in partnership with LotuMoui Health Committees and church Ministers in the development and implementation of church-based initiatives.
7.4 Cross-sector Collaboration

The mental health and addiction needs of Pacific peoples are often complex and in many cases require solutions to take a cross-sector approach to service delivery which may extend beyond the health sector. CMDHB recognises the importance of working collaboratively with organisations and government agencies such as family social services, education, housing, employment and income support services. CMDHB intends to strengthen its existing and build new partnerships cross-sectorally to ensure that its mental health and addiction services are well coordinated, holistic in approach and meet the diverse needs of the Pacific population.

7.5 Regional and National participation

CMDHB has also participated in the development of a range of regional projects identified as priorities by Moana Pasefika and NDSA. This involvement in regional projects is likely to expand to include Regional Service Planning. CMDHB will also collaborate nationally with other DHB’s on issues relevant to all DHB’s.

8.0 Monitoring Framework

Monitoring the progress of the Implementation Plan is important to ensure:
- There is accountability for key stakeholders in service provision and delivery;
- Future planning and funding decisions are based on data collection, evidence and key learnings; and,
- Information can be prepared and appropriately disseminated to a range of different stakeholders as required.

A simple monitoring template has been developed to assist key stakeholders in the collection of information for reporting purposes. Key stakeholders which have a ‘lead responsibility’ for a key deliverable within the Implementation Plan will be required to report quarterly on progress until completion of the deliverable.

Oversight for the implementation and monitoring of the Plan will sit with the CMDHB Pacific Health Division and the Mental Health and Addictions Planning and Funding Team. A copy of the monitoring template is outlined in Appendix A.

8.1 Outcomes Framework

Monitoring reports will provide useful information to track progress in implementing the plan over time in Counties Manukau. This Outcomes Framework is based on the CMDHB District Strategic Plan (2005) and provides a basis for monitoring progress within each action area of this Implementation Plan. The Outcomes Framework comprises six action areas:
1. Improve community wellbeing
2. Improve child and youth health
3. Reduce the incidence and impact of priority conditions
4. Reduce inequalities of health status
5. Improve health sector responsiveness to individual and family/whaanau need
6. Improve the capacity of the health sector to deliver quality services.

Monitoring Reports, evaluation and research activities will provide useful information to track changes in population mental health and addiction indicators for Pacific peoples over time in the Counties Manukau District. Information captured in the monitoring reports will support reporting against the Outcomes Framework.
9.0 Funding and Planning Mechanisms

As community mental health services are developed, ‘by Pacific’ services will be developed in line with CMDHB funding allocation principles and Blueprint targets. Implementing this plan will involve both Pacific Health funding (e.g., Lotu Moi funding, Pacific Provider Development Funding) and Mental Health Blueprint and Demographic funding. It is estimated that total additional Blueprint Funding and Mental Health Demographic Funding received by the DHB and available for new services will be approximately $3.2M each year from 2008/09 through to 2012/13. An estimated 20 percent of this funding each year will be made available for the expansion or development of ‘by Pacific’ services. However actual levels of funding are likely to fluctuate from those indicated above and plans for expenditure will need to be adjusted on the basis of funding advice received from the Government each year, and on improved information about actual service levels relative to Blueprint. The annual process in which local funding for new services is allocated is outlined in figure 1. below.

Figure 1. Annual Funding Process for new services.
Although the Implementation Plan pertains to the CMDHB District, there are many funding and planning decisions that will need to be made within the regional context, especially as some services are provided regionally.

Specific regional Pacific mental health and addictions funding and planning mechanisms have been introduced during 2007 and indicate a regional commitment to improve mental health and addictions services for Pacific communities across the region while not limiting local development. The relationships of the regional funding and planning mechanisms are outlined in Figure 2 below.

## Foster and support innovation in the design and delivery of Pacific mental health and addictions services.

**Goal:**
- Foster and support innovation in the design and delivery of Pacific mental health and addictions services.

**Deliverables:**
- Subject to positive evaluation CMDHB will build on its peer support innovation of Faleleia services.
- CMDHB will explore strategies that support the development of Pacific consumer skills, leadership and participation.
- CMDHB will support the NDSA to undertake a scoping project to explore consumer leadership frameworks to inform the continual quality improvement of mental health and addiction services.
- CMDHB will explore initiatives that support the development of Pacific consumer leadership skills, leadership and participation.

**Objectives:**
- To provide Pacific, cultural advice to CMDHB and NGO mental health and addiction services.
- To foster Pacific community leadership and participation, including consumer leadership in service planning, delivery, and evaluation processes.

Counties Manukau District Health Board on behalf of four northern district health boards, (2003). The Northern Regional Pacific Mental Health and Addictions Plan 2003/05. Counties Manukau District Health Board, Manukau.

A holistic approach to health and wellbeing...

Pacific people have a holistic view of health where a person is in tune with his/her environment and community. Health is achieved when there are positive and balanced relationships between these three elements: Atua (God), Tagata (people) and Laufanua (land/environment). Health is the state in which a person’s physical, mental and spiritual needs are in balance and the person is able to meet their obligations to themselves, their family, village and community (Lui, 2003).
